D9: DATABASE WPI, AN 1988-122604 & JP-A-63 066110

1. Novelty

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1, 2 and 5-16 is not new in the sense of Article 33(2) PCT.

1.1 D1 discloses the use of flavanones in topical cosmetic or dermatological compositions for the prophylaxis or treatment of skin and hair disorders and for improving skin and hair conditions (see D1, claims 1-4, paragraph [0058]).

The subject-matter of independent claims 8 and 9 is therefore not novel.

The additional technical features of claims 10 and 12-16 are also to be found in the disclosure of D1 as follows:

- claim 10: hesperidin, naringin (see D1, claim 11),
- claim 10: eriodictyol-7-glucoside (see D1, claim 11),
- claim 12: cosmetic or pharmaceutical composition for topical application (see D1, paragraphs [0107], [0111]),
- claim 13: flavanone compounds in an amount of from 0.001 to 10 % in weight by weight of the total composition (see D1, paragraph [0099]),
- claims 14-16: flavanones are used as active agents against skin aging, to protect skin

from UV radiation and from environmental damaging factors, for the treatment of dry skin and pigmentation disorders and against hair loss (see D1, paragraph [0058]).

The subject-matter of claims 10 and 12-16 is thus not novel.

2.2 D2 discloses the use of modified flavonones and their use in the prophylaxis or treatment of hair disorders and for improving hair conditions (see D2, claims 1, 3 and 13; page 14, lines 13-19).

The subject-matter of independent claims 8 and 9 is therefore not novel.

The additional technical features of claims 10, 12, 13, 15 and 16 are also to be found in the disclosure of D2 as follows:

- claim 10: alpha-glycosyl hesperidin and alpha-glycosyl naringin, synthetically produced (see D2, claim 3; page 10, line 51 - page 12, line 12),
- claim 12: topical cosmetic product (see D2, claim 10),
- claim 13: 0.001-10% by weight of flavanone (see D2, claim 7; example 4),
- claims 15 and 16: flavanones are used against hair loss, for imparting a gloss to hair and against inflammation (see D2, example 4; claim 13; page 14, lines 13-19).

The subject-matter of claims 10, 12, 13, 15 and 16 is thus not novel.

2.3 D3 discloses an extract from lemon peel containing flavanones used in a hair growth formula (see D3, claim 1).

The subject-matter of independent claims 8 and 9 is therefore not novel.

The additional technical features of claims 10-13 and 16 are also to be found in the disclosure of D3 (see D3, claim 1; column 2, lines 20-35; column 1, lines 11 and 34). Therefore the subject-matter of claims 10-13 and 16 is not novel.

2.4 D4 discloses the use of hesperidin, naringin or poncirin as active agents in topical compositions against skin cancer (see D4, claims 1, 10 and 13). The amounts of these compounds used are disclosed in D4, Tables 1 and 2.

The subject-matter of claims 8-10, 12 and 15 is thus not new.

2.5 D5 discloses the use of hesperidin, naringin or eridictyol as active agents in cosmetic compositions against dry skin, aging and wrinkles (see D5, claims 1, 6 and 7; examples 6-8, 10 and 11).

The subject-matter of claims 8-10 and 12-15 is thus not new.

2.6 D6 discloses an antimicrobial shampoo composition for the treatment of inflammation and itching made from pomelo extract and containing naringin and carotin (see D6, abstract).

The subject-matter of claims 8-12 and 14-16 is thus not new.

2.7 D7 discloses food and drink, cosmetic and pharmaceutical compositions comprising eriodictyol-7-rutinoside or lemon flavonoids and vitamin C as free radical scavenger cosmetic or pharmaceutical active agents.

The subject-matter of claims 1, 2, 5, 6-12 and 14 is thus not new.

2.8 D8 discloses a nutrition supplement food for the treatment of baldness containing hesperidin (1%) and vitamin E or catechin.

The subject-matter of claims 1, 2, 6-10, 12, 13 and 16 is thus not new.

2.9 D9 discloses a cosmetic product containing methylhesperidin useful for preventing sunburn and hair decolouration.

The subject-matter of claims 8-10, 12 and 14-16 is thus not new.

The subject-matter of dependent claims 3 and 4 is considered as novel.

3. Inventive activity

Starting from D7 as closest prior art and taking into account the disclosure of D9, it seems

that dependent claims 3, 4 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT).

Re Item VIII.

The compounds referred in claims 1, 8, 9 and 13 as "flavanone derivatives" are not defined. A derivative of a flavanone can even have lost the flavanone structure as a result of the derivatization reaction. The expression "flavanone derivatives" is not acceptable according to the requirements of clarity (Art. 6 PCT).
